Part Three, "The Human Impact," examines the profound impact that humans have had on the Earth's ecosystems. Buzzell traces the history of human civilization, from the first agricultural societies to the Industrial Revolution, and he shows how each stage of human development has led to increased environmental damage.

Part Four, "The Future of Earth," offers a thought-provoking vision for the future. Buzzell argues that we are facing a critical point in human history, and that we must make a choice between two paths: the path of destruction or the path of sustainability.
